DISCUSSION/RATIONALE:

The site consists of 103 acres of undeveloped land with 5 interconnected ponds flowing to Lake Whitney, a former drinking water reservoir to be reactivated in the future. The site was used by the Winchester Repeating Arms Company to store gunpowder, as a firing range for testing bullets and artillery and for the disposal and incineration of various wastes. The PRP (Olin Corp.) is working with CTDEP on the investigation and remediation of a nearby neighborhood, and the site investigation of the site will resume, per letter from CT DEP and Consent Order.
